WHO WE ARE

We're an experienced and reliable partner that will help you evolve with certainty.

We build AI-powered digital solutions that transform businesses by automating processes, streamlining operations, or creating new products and services.

Our **Own The Edge** approach to custom software development cuts through the complexity and delivers real solutions in incremental stages with results that compound over time, and make you win.

When you can automate your
business, create tech enabled
opportunities, and move quickly
you gain a competitive edge.

OWN THE EDGE

Our unique approach to building smart digital solutions helps you...

TAKE SMALL STEPS

Large digital projects can be overwhelming and ineffective. We break the process down so you see incremental success.

BE NIMBLE. ADD VALUE SOONER

To be competitive you need to change and add value fast. Our talented team helps you do that.

MAKE CHANGE

We turn plans into action so you can move quickly and gain a competitive edge.

Horizon Digital

WHAT OUR CLIENT'S SAY

Ben Forrest
WA Utilities

"The updated jobs portal has been met with lots of excitement internally and from our key client, ATCO Gas.

Our team can now complete job forms onsite, saving considerable admin time in the office. It also gives us real-time production data and first-person data entry."

Andrew Ivins
BHP

"When it comes to hiring talent, it's not just about the rates - it's about finding the right fit.

And that's exactly what I discovered with the team at Horizon Digital.

They're not just another agency filling chairs; they're engineers and developers themselves so there is a genuine understanding of your needs."

Brad Kobus
Hiremii

"Horizon Digital is a vital partner for Hiremii's recruitment technology development. They are flexible and have the expertise needed to develop an innovative technology platform, as well as assist with its commercialisation.

It has been a pleasure to work with a team of professionals that bring a range of important skills to our project."
